# Milkymist Shop

**March 18, 2021**

## **Mini Project Extension**

## **45% Completed of the Main Project**

## Overview

The website Milkymist shop is designed to increase the sales of products Manufactured at milkymist development society. The list of products includes bakery items, milk products, ice cream, etc.

In the current system, the products are sold in nearby shops and the customers need to visit the shop to purchase so in this way unavailability of products in the shops are the main problem. If we customize the selling and purchase online will increase the business.

## Modules

### 1. Admin

Admin can view employee, shop owner, user details and also approve/reject, employee details and view delivery details. He/she can add new product details. Admin can view product sale analysis.

### 2. Shop owner
